All the Heads of the Departments and faculty members were present for this function. NSS volunteers actively participated in this Blood Donation Camp. Blood donation builds a sense of community and solidarity. It's a simple way for people to give back and make a direct impact on the health and well-being of others in their community. Patients with chronic illnesses like sickle cell disease or thalassemia often need regular blood transfusions to manage their conditions, making blood donations crucial for their treatment. Regular blood donation can help ensure that hospitals and healthcare systems have the resources they need to treat a variety of patients, making it a vital contribution to public health.
Outcome(s):	➤ Donors gain health benefits and emotional rewards, while recipients get the life-saving blood they need. ➤ The healthcare system is supported in its critical mission to care for the public. ➤ 134 donors donated their Blood
